PROFESSIONAL SUMMARY

FP&A professional with 2+ years of experience supporting budgeting, forecasting, variance analysis, and Annual Operating Plan (AOP) cycles in a business finance role. Delivered 10+ recurring financial reports monthly, cut report preparation time by up to 50% through AI-assisted automation, and managed cost centre tracking across a 10-centre portfolio. Proficient in Advanced Excel and financial reporting; currently building hands-on Power BI proficiency (data modeling, DAX, Power Query) to strengthen dashboarding and analytics capability.

CORE SKILLS

FP&A & Finance: Budgeting | Forecasting | Variance Analysis | P&L Analysis | AOP Planning | Cost Optimisation | Cost Centre Reporting | Revenue Forecasting | Budget Monitoring

Tools & Analytics: Advanced Excel (Pivot Tables, XLOOKUP, INDEX-MATCH) | Claude AI | VBN/Macros with AI | SAP Concur | MS Office | SQL | Tally ERP |

Currently Upskilling: *Power BI (Data Modeling, DAX, Power Query, Time Intelligence) — structured 4-week program in progress*

PROFESSIONAL EXPERIENCE

Associate – Business Finance (FP&A)

UST Global | April 2024 – Present

- Automated recurring financial reports using AI-assisted tools, reducing manual report preparation time by 30–50% and accelerating turnaround for monthly business reviews.
- Tracked headcount and associated costs across a portfolio of 10 cost centres, supporting accurate cost centre reporting and budget monitoring for operational planning.
- Prepared and analysed P&L statements and performed variance analysis, comparing actuals against budgets and forecasts to flag risks and support management decision-making.
- Delivered 10+ recurring financial reports monthly to business stakeholders on a consistent timeline, supporting monthly financial reviews and operational planning.
- Supported Annual Operating Plan (AOP) planning and reporting cycles, coordinating with cross-functional and cost centre teams to consolidate budgeting and forecasting inputs.
- Reviewed and approved Service Order (SO) and Purchase Requisitions (PR), ensuring compliance with internal financial controls.
- Tracked monthly revenue submissions and analysed variance drivers to support forecasting accuracy and management reporting.
- Supported pipeline and PIP (Price Interest Point) tracking and updates for the business finance team.
